

that time (prior to 1555) living a highly civilized life along the rich and fertile Nile, submissive to Allah. We were successful and had mastered many of the sciences of life, such as Mathematics, Physiology, Astronomy and many, many others.

Higher mathematics was taught to children and they could be seen playing with diamonds larger than rocks; our wealth was very great.

Sir John Hawkins lived all/tall among our people for 29 1/2 years before he committed the evil act in 1555, which doomed the white race to destruction. In all that time, he never told a lie to the holy tribe of Shabazz, and he won their confidence. He observed the Black people very closely, learning their nature, habits and science of life. When John Hawkins thought he won the Original nations confidence to the point where they would believe what he said on face (white) value, he then put his plan into effect. He started a rumor that, "there is a land flowing with milk and honey (wealth) across the seas". (America turned out to be such a place for the white devils). This rumor spreaded until many of the brothers had become curious and wanted to know where this land was (at).

John Hawkins waited until the right moment and then invited the brothers who were interested to come aboard his ship and together they could go over the maps. Once aboard the Muslims were taken into the hole of the ship where the maps were supposed to be located. When the Muslims were down and out of sight, the crewmen quietly lifted the anchor so that the ship would be carried out to open sea. Upon discovering that they had been tricked and there was no such "Land of milk and honey," the Muslim brothers tried to scramble out of the hole and get off the ship, but they were subdued. John Hawkins set sail for America with his cargo. On the way over, there were some stops for re-supplying the ship with provisions; anytime one of the Muslims (now so-called Negroes) were allowed out of the hole, he saw it as a chance to escape, many brothers did and having wisdom, knowledge and understanding, were able to build civilizations, such as the civilizations in many Islands of the West Indies.

After traveling from the Holy land, "The good ship Jesus," landed at Jamestown Virginia in 1555. At first the Muslims brothers (our Fathers) were not treated too badly (although they could not return to their own land) because the devils wanted the Black brothers to reproduce themselves (have children) so that he could start "Making" his slave race.

Whenever a child was born to the captured Muslims it was taken away from the Black mother and father. A white (devil) nurse was on hand to take the child to another part of the area to take care of it. The devils (white race) knew that if the Black mother and father were allowed to rear (raise) their own child, they would teach the child knowledge of self and God, and therefore, with such knowledge the child, like his father before him, would not submit to being a slave (not willingly, anyway).

By using a white nurse the child would only be taught what the slave-master wanted him to know (no knowledge of self). When one of the Black children would cry for his mother's breast, the devil (white race) nurse would dip a strip of swine fat in molasses and
