

Table Talks with Muhammad (continued)

Vol. 1 #6

Answer: That's right and these scholars always writing about Muhammad, they won't pick that part up. That shows they are opposed to anyone claiming this office but Muhammad of 1400 years ago. The writer Muhammad Ali in his footnote points out that some of the scholars think that it was the Angel Gabriel speaking to Muhammad but he points out it was God himself. See, this couldn't be the right Muhammad since he was pointed out only as one hearing voices. The Holy Quran teaches that the Saints hear voices too but that doesn't make them prophets. Now remember that for this is beautiful. They (the Saints) hear voices too but that doesn't make them prophets. We have people in this old evil time that want you to believe that they have been inspired by God just in an old dream. "You know I dreamed such and such a thing. I want to tell my dream." But in the Holy Qurans such acts are condemned; it is very well put there to keep down anything like that which came up in Moses' time, a lot of diviners and a lot of dreamers. Isaih's teachings prophecy this same point; he says if you dream a dream, tell a dream. Don't try to make it other than what it is by calling it a vision. This is what most of them would like for you to do, that is consider thier dream a vision. I didn't have a dream they say, I had a vision and I saw such and such a thing and I heard the Lord say so and so... They do that today in order to claim divinity. So the Bible is right when it warns us that if you have a dream just say I dreamed so and so, don't try to make it some kind of divine vision. I asked the Saviour about dreams and He said brother we don't pay any attention to dreams. Now think over that. This was His first answer. Then He told me about one of His dreams. He said, "I had a dream once when I was six years old. I dreamed that I was over here in America pushing these big Devils like Rockefeller and Dupont and the like in a lake of fire". And then He glanced back at me and said, "I see my dream coming true." He did this to let me know all dreams are not false because He had dreamed one Himself (smile). So you see one thing He wanted me to be sure of is that He came to push this Devil in a lake of fire. He dreamed it when He was six years old like Yacub dreamed or had his vision that he was going to make a Devil when he was six. Well when He (The Saviour) was six He had a dream that He was going to kill that Devil. See how beautiful it is? Both boys six saw thier future when they were six years old. It is wonderful to get this kind of teaching from Allah through a Messenger. Now again there is another teaching from the Holy Quran you don't find them (the writers of and about the Old Islam) harping about. It is this: The Holy Quran teaches that He (Allah) and His apostle were drawn together on the farthest horizon. This point is not taught because some one might wake up. Muhammad Ibn Abdullah of Arabia was never out of Arabia. If therefore he was never out of Arabia how could he be seen on the farthest horizon? The farthest horizon is to the dateline in the Pacific. Then this makes the Western Hemisphere the farthest horizon (from the East). When the sun rises over here on the U.S.A. it is the furthest for the other little islands in between are just stepping stones for this is a continent. No sir you don't hear them harping on that. Remember the writers do not have the knowledge we have and anything that will make you think or that they don't understand they just kind-of skip over it.
